Re: App# 10/811, 352

Hey Katherine, Thanks for dropping me a line. And thanks for helping me sort this all out. Please find enclosed, my elected species and a listing of claims readable thereon. Additionally, please find disclosed below two generic claims that we may want to amend into said following list of existing claims...

I elect for consideration:

Species II (Figures #3 - #8) with existing claims #1, #3, #6, #7, #8, #9, #11 and #22 reading thereon...And two somewhat generic claims for possible future amendment...

#1. I claim: A multipurpose hand tool with a variable edge which effectively and releasably orients itself to a user hand, and therein effects, manipulates and reacts with and to virtually all natural and synthetic fluid mass presented while providing said user with a full and complete range of motion thereby allowing said user the heretofore unrealized ability to multitask secondary natural and synthetic stratum while said multipurpose hand tool occupies space in, on and about said user hand. (Fig. AOK).

#2. I claim: The devise and components of claims #1 and #22 being provided as a single use, possibly disposable or short term product.

Hopefully this election of species and claims will make your efforts a little easier, and of course, if you feel that my selections are still a bit "off track", I trust that you will note my request under MPEP 707.07 and feel free to suggest stronger, better, more appropriate means of discouraging foreign interference on American Soil...

I look forward to hearing your thought at your earliest convenience. If there is anything more that I can do for you, please drop me a line anytime...

Happy Trails, Tasty Waves, Blue Sky's
